

Critical Thinking

One of the greatest challenges organizations face is fostering innovation while still practicing critical thinking and logical decision-making. The Critical Thinking Process guides us through all the phases of generating and evaluating new ideas, and can help organizations solve problems using rational thought and logical decision-making.

Using the Critical Thinking Process, this seminar will help you to pinpoint opportunities for improvement, brainstorm creatively, logically evaluate options, and make informed decisions that will lead to success. The tools discussed will help you become proactive instead of reactive in the face of problems and move from possibilities to solutions!

Seminar Objectives:

- Apply decision-making techniques to choose effective solutions
- Critically evaluate alternatives using reasoning strategies
- Utilize defined processes to identify and analyze challenging problems
- Employ brainstorming techniques using idea fluency
- Follow the Critical Thinking Process to encourage logical decision-making

Join us for [Critical Thinking](#).
